

# TPS/i

## TWIN systems

Effortless control  
to unleash your  
welding potential

### TPS/i TWIN systems – Tandem welding has never been so easy

Our latest innovation offers maximum control and time savings with intelligent welding processes that automatically adjust welding parameters and variables in the background, supported by robotic assistance systems as well as automatic changeover and cleaning systems.

**Self-regulating  
process**

**High-speed  
welding**

**High  
deposition  
rate**

**Smart  
assistance  
systems**

**Totally stable  
welding**
