

/ Perfect Welding / Solar Energy / Perfect Charging

# ARCTIG

Fast, Simple, Profitable

# STAINLESS STEEL PIPE 10 MM. SINGLE-PASS WELD. NO JOINT PREPARATION.

Whether it's for the construction of pipes or containers, or for use in air and space travel technology, the new TIG Welding Process ArcTig offers the optimal solution for all those who have the very highest quality standards for their weld seam, while also seeking a simple and, above all, cost-effective solution. With mechanized and robot-assisted applications, materials up to 10 mm can be single-pass welded without processing.

What's your  
welding challenge?

— Let's get connected.

# THE ADVANTAGES OF ARCTIG

## REDUCED PREPARATION AND REWORKING

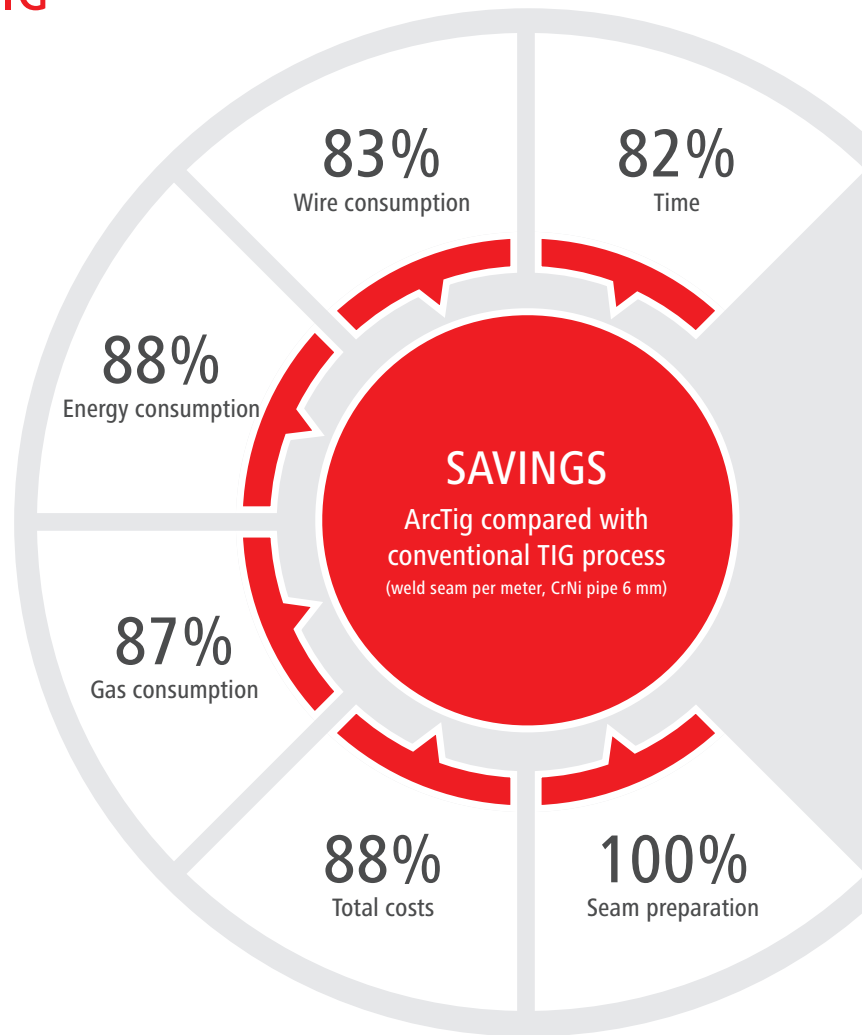

- / Minimal to no processing up to a material thickness of 10 mm
- / Savings on gas, filler metal and electricity
- / Low welding reinforcement and low distortion
- / Spatter-free

## INCREASED WELDING SPEED

- / Up to 100% increase in welding speed compared to the conventional TIG process

## EASY HANDLING

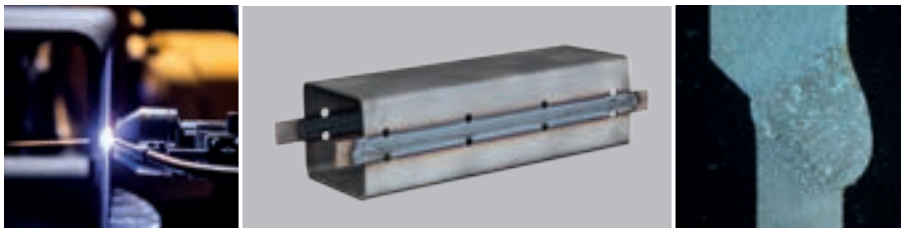

- / Easy setting and selection of welding parameters
- / Easy replacement and regrinding of the electrodes
- / Electrode clamping system for adjusting the free end of the electrode
- / Flexibility regarding the welding position

# APPLICATIONS

## LONGITUDINAL SEAM

Steel girders, profiles pipes, beams, housings

## MATERIALS

CrNi	NiBas
Steel	Titanium
(Super) duplex	

## CIRCUMFERENTIAL WELD

Hydraulic cylinders, pipes, containers

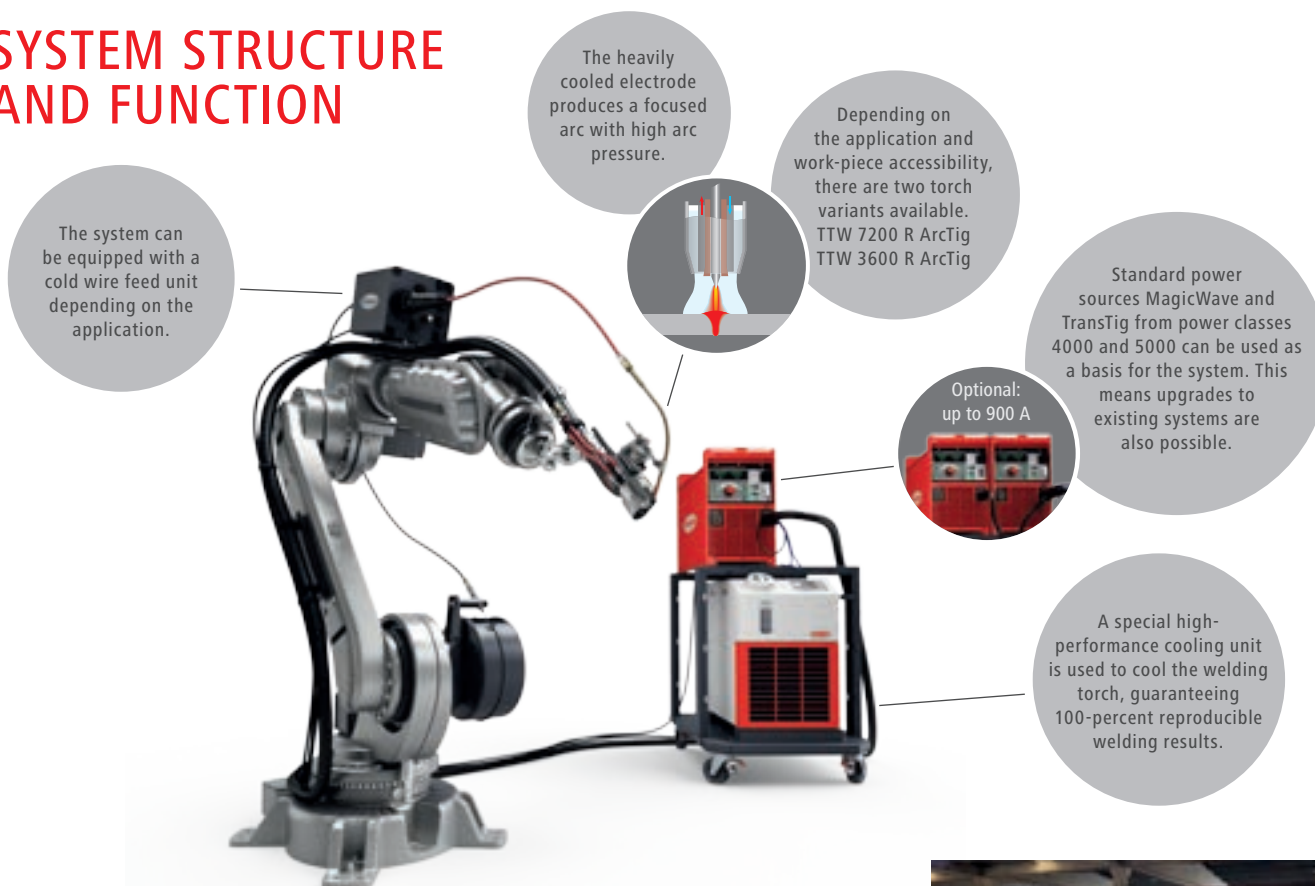

## MATERIAL THICKNESS

CrNi: 3–10 mm (single-pass)
Steel: 3–8 mm (single-pass)

## POSITIONS

PA	PC
----	----

# SYSTEM STRUCTURE AND FUNCTION

## CUSTOMER EXAMPLE: TEKNOKROM

Container construction specialist Teknokrom—based in Izmir, Turkey—produces chrome-nickel tanks for the food industry. Using ArcTig, Teknokrom is able to triple the welding speed per layer. Furthermore, the new process means an ideal result can be achieved with just one layer, whereas four would have been required using classic TIG welding.

/ Perfect Welding / Solar Energy / Perfect Charging

## THREE BUSINESS UNITS, ONE GOAL: TO SET THE STANDARD THROUGH TECHNOLOGICAL ADVANCEMENT.

What began in 1945 as a one-man operation now sets technological standards in the fields of welding technology, photovoltaics and battery charging. Today, the company has around 4,550 employees worldwide and 1,241 patents for product development show the innovative spirit within the company. Sustainable development means for us to implement environmentally relevant and social aspects equally with economic factors. Our goal has remained constant throughout: to be the innovation leader.
