

DELTA CON

RESISTANCE SPOT WELDING

APPLICATIONS

- / Automotive industry
- / Railway vehicle construction
- / Aerospace industry
- / White goods

PRODUCT VARIANTS

C-GUN

X-GUN

CUSTOM TAILORED SOLUTIONS FROM A SINGLE SOURCE

- / Fronius offers an entire system, including the appropriate services (commissioning, training, maintenance, etc.)
- / Preferred components (servo drive, transformer, hosepack and inverter) can be chosen by the customer
- / Different electrode holders can be used depending on the accessibility to the component and the required electrode force
- / The arm geometry can easily be adapted to the customer's needs

SIMPLE GUN DESIGN

- / Low storage costs for spare parts, as the same main gun body and main components are used for the X-gun and C-gun geometries
- / Only one transformer for all aluminium applications
- / Extremely easy to repair and service

NO LATERALLY PROTRUDING PARTS

- / All cables and hoses are routed inside of the gun body and provide unrestricted access to welds
- / The sensor PC board is waterproof and located in a housing inside the gun body
