

24 HOURS OF SUN

A WORLD WITH 100% RENEWABLE ENERGY

/ We want to leave a world worth living in to our children.

Our future lies in renewables
and you are an important part of it.

24 hours of sun is possible.

YOU ARE 24 HOURS OF SUN

/ The Proetsch family own a 5kW PV-system. Every year they produce 4,750kWh electricity and therefore save 2.5 tons of CO₂.

"It wasn't just the cost saving that persuaded us to install a PV system. The pleasure of being able to produce our own electricity was the real clincher. It has also significantly raised awareness in the family about our own energy requirements." - Roland Prötsch

YEARLY SAVINGS OF THE PROETSCH FAMILY:

2.5 TONS CO₂

22 YEARS
one lightbulb lit

120 HOURS
driving

2 YEARS
watching TV

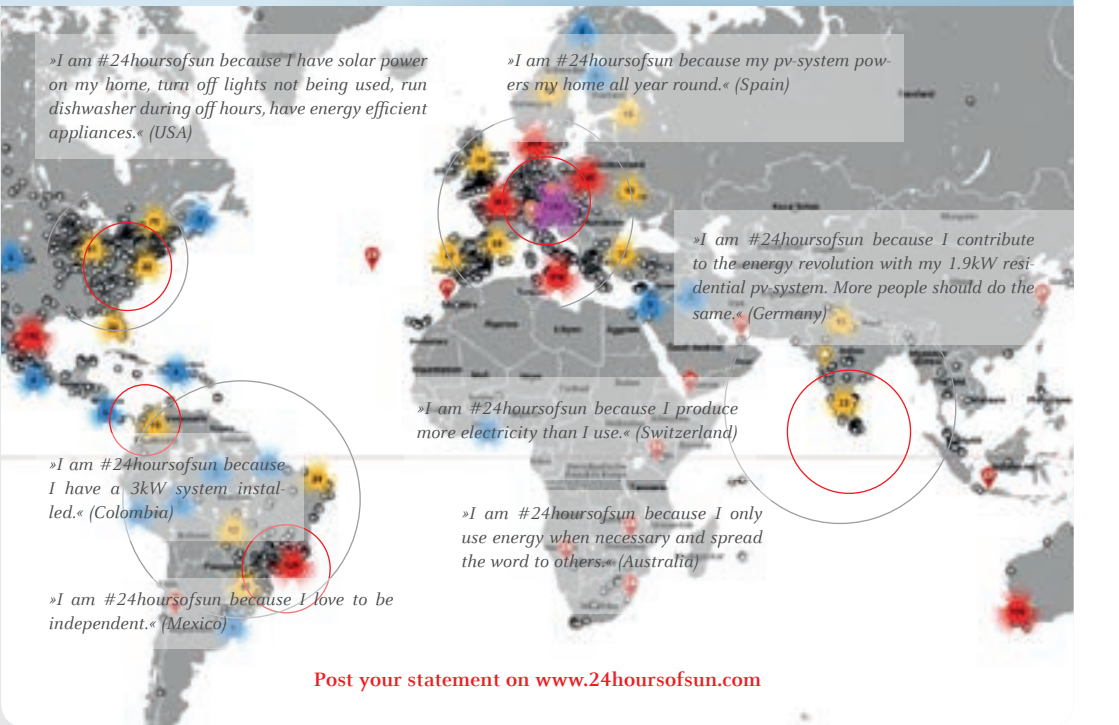

WE ALL ARE 24 HOURS OF SUN

/ All over the world people are already contributing to the energy revolution.

/ You produce clean energy? Be proud of it!
Talk about your contribution to 24 hours of sun and
encourage others to do their bit.

Together we can change the world.

/ On www.24hoursofsun.com you can display
and share your contribution.

A world map with several red circles highlighting specific locations. Each circle is connected to a text box containing a personal statement about solar energy use. The locations include the USA, Spain, Germany, Switzerland, Colombia, Mexico, and Australia.

»I am #24hoursofsun because I have solar power on my home, turn off lights not being used, run dishwasher during off hours, have energy efficient appliances.« (USA)

»I am #24hoursofsun because my pv-system powers my home all year round.« (Spain)

»I am #24hoursofsun because I contribute to the energy revolution with my 1.9kW residential pv-system. More people should do the same.« (Germany)

»I am #24hoursofsun because I produce more electricity than I use.« (Switzerland)

»I am #24hoursofsun because I have a 3kW system installed.« (Colombia)

»I am #24hoursofsun because I only use energy when necessary and spread the word to others.« (Australia)

»I am #24hoursofsun because I love to be independent.« (Mexico)

Post your statement on www.24hoursofsun.com

BE PART OF THE 24 HOURS OF SUN FUTURE!

/ Small things can go a long way. You can make your own personal contribution in the global effort for a renewable energy future.

A FEW SIMPLE IDEAS THAT CAN HAVE A BIG IMPACT:

/ Actively use clean energy

Why always take the car? For short distances e-bikes are great modes of transport.

/ Save energy

Use energy efficient household appliances and save additional power by turning them off when not in use instead of leaving them on stand-by mode. Or opt for LED lights instead of conventional light bulbs.

/ Produce, store and share your own electricity

You can produce your own electricity with a PV-system. The power you don't need during the day can be stored in batteries for later in the day or fed into the grid.

SPREAD THE WORD!

/ Show everyone you are part of 24 hours of sun with this sticker.

**PEEL OFF
STICKER**

GET STARTED!

/ You want to own a PV-system? No problem. We look forward to a consultation:
