5 + 5 YEARS FRONIUS WARRANTY FAQs

Which inverters are included under the 5 + 5 years Fronius Warranty promotion?

All **string inverters** installed and registered between 01/01/2015 and 31/12/2019 **which have been sold into the Australian and New Zealand markets by Fronius Australia**. To validate your data, we may ask you to provide your purchase invoice, the serial number of the device and your commissioning report (in Australia: COES – Certificate of Electrical Safety).

Please note: To redeem the warranty promotion certificate you will have to register online at www.solarweb.com

What effect does this offer have on the warranty I already have for the inverter in question?

For the first 5 years, you will enjoy the standard Fronius Warranty Plus on all inverters covered by this offer. By registering your Fronius device, this warranty can be extended with an additional 5 years Fronius Warranty. Please note that the warranty holder must register the inverter (with the inverter's serial number) online at www.solarweb.com.

What does Fronius Warranty actually mean?

Under the Fronius Warranty, Fronius will only cover the costs of materials to repair the inverter. Any other costs incurred such as transport or labour, will not be covered by Fronius.

In what ways do the Fronius Warranty and the Fronius Warranty Plus differ?

The Fronius Warranty Plus applies for the first 5 years of all Fronius inverters. It also includes labour and transport costs (Australia wide). The Fronius Warranty covers cost for parts only; labour and transport costs are not included.

How can I, as an end customer, make a claim under the warranty?

To make a claim under the 5 + 5 Years Fronius Warranty, keep the offer certificate, the purchasing invoice and commissioning record/Certificate of Electrical Safety (COES) and hand in all three documents to your installer when servicing is required. You will not be able to make any claims under this offer unless these documents are provided.

How does the installer make a claim under the warranty?

When making a claim under the 5 + 5 Years Fronius Warranty, the installer sends the offer certificate, the purchasing invoice and commissioning record/Certificate of Electrical Safety (COES) to Fronius Australia Technical Support via pv-support-australia@fronius.com.

What does 'parts warranty' mean in the event that a PC board is replaced?

The installer/service agent will be charged by Fronius for transport of the replacement part/s. These costs and any other additional labour costs will not be covered by Fronius.

What does the 5 + 5 years Fronius Warranty mean in the event that an inverter is replaced?

If the inverter fails during the first 5 years of the 5 + 5 Fronius Warranty (i.e. years 1-5), the cost of any replacement parts, labour and transport will be covered by Fronius. If the inverter fails during the second 5 years of the 5 + 5 Fronius Warranty (i.e. years 6-10), Fronius will charge the installer a set repair fee and transport fee. In the majority of cases, these costs will then be passed on to the end customer. Any other additional labour costs will not be covered by Fronius.

How much does the set repair fee amount to?

The average set repair fee is \$175+GST for all inverters covered by the parts warranty. This figure is an indication only and subject to change.

How much does the set transport fee amount to?

The average set transport fee for components is \$50+GST. For small Fronius IG, Fronius IG Plus units with single power stage sets and small Fronius SnapINverters (<10kW), the average transport fee is \$110+GST. For large Fronius SnapINverters (≥10kW) and Fronius IG Plus Inverters with two or three power stage sets, the average transport fee is \$210+GST. These figures are an indication only and subject to change.

In addition to the 5 + 5 Years Fronius Warranty, I would also like to purchase a warranty extension; for coverage of up to a total of 20 years – for example on the Fronius Warranty Extension Plus. Is this still possible?

Yes, this is still possible. If you choose to purchase an extension of the Fronius Warranty Plus for up to a total of 20 years, it will override the Fronius 5 + 5 Years Warranty offer. If you choose to purchase an extension of the Fronius Warranty for up to a total of 20 years, the first 5 years will still be covered by the Fronius Warranty Plus, with the following 15 years covered by the Fronius Warranty.

In addition to the 5 + 5 Years Fronius Warranty, I would also like to purchase a Fronius Warranty Extension Plus to extend the total warranty coverage to 20 years. How can I do this?

You are able to purchase Fronius Warranty Extensions for Fronius inverters up to 30 months after dispatch from Fronius. Fronius Warranty Extensions allow you to cover your needs better than before. Please contact Fronius Australia at pv-sales-australia@fronius.com for pricing and further information.

Where can I get more information about the Fronius Warranties?

Please see www.fronius.com/solar/warranty for further information.
