

## SAWATZKY MANUFACTURE, RIVA PALCIO, CHIHUAHUA.

/ Manufacture

/ In Chihuahua State, many livestock and farming industries have been benefited with finance programs and facilities for PV Systems installations. Nevertheless there are other factories that are now interested in solar because of general earnings.

/ Sawatzky Manufacture Company is a firm that recently installed PV modules. It is now a regional example of using and maintaining clean energies, being an organization that thinks in the future, as installer Jacob Peters comments about the end customer.

/ They trusted in our Fronius Symo with 24 kW as nominal power. No matter the size of the device, the inverter can exploit the energy of 100 modules that were roof-mounted. The space that it needs to be mounted is quite narrow which is good for a place where many machines and tools are installed.

INSTALLATION DATA	
Size of installation (kWp)	25.5 kWp
Module type and area	Rooftop mounting.
Inverter	1 Fronius SYMO 24.0-3 480
Commissioned	March 2018
Annual yield	50,000 kWh
CO2 saved/ year	37.5 ton CO2
