SYSTEMS AND ACCOUNTS ON SOLAR.WEB

A system in Solar.web can have an undefined number of accounts assigned to it. In order to have access to a system and its monitoring features, each Solar.web account has to be added in the permission part of the system. Accounts can be added with either supervisor or guest rights. Accounts with supervisor rights will be able to add further accounts to the system.

Once an account is added to a system it will appear in the 'My PV system' list of the corresponding system account. This is the list/page that opens after logging in:

Name	Inv.	kWh/kWp	kWh Today	Last update	Errors Today
	5	2.44	708.40	23/08/2016 04:14 PM	0
	1	2.86	17.13	23/08/2016 04:11 PM	0
	1	3.32	9.96	23/08/2016 03:16 PM	0
	1	4.62	23.12	23/08/2016 04:14 PM	0

My PV system page – start page after login

In order to setup monitoring for a customer or to give a company access to a system for monitoring and maintenance purpose, their accounts have to be added to the system after the commissioning process of the DataManager Card 2 (see *Setting-up monitoring via smart device* quick guide) is completed.

Only an existing Solar.web account can be added to a system. If the person who should be added to the system has not got an account on Solar.web, a new account has to be registered on Solar.web before it can be added to the system.

Register a new account on Solar.web

A new account can be registered by accessing the Solar.web website via www.solarweb.com and selecting 'Register' in the 'Login' field on the right:

www.solarweb.com – start page

You will need the username once the registration process is complete in order to assign the account access to a Solar.web system. The username is always an email address.

An activation email is sent to the registered email address and must be activated before an account can be assigned to a Solar.web system.

Adding an account to a system

Login into your Solar.web account and select the system to which you want to add the (new) account/person. In this example we chose the system of our Australian subsidiary: 'Fronius AUS Melbourne'

Add the account username you wish to assign to the Solar.web system, select the user rights access limit and save your changes.

The screenshot shows the 'Manage user rights' page in the Solar.web interface. It features a table with columns for 'username', 'User rights', and a save icon. The table lists two entries: '10system' with 'Supervisor' rights and '5system' with 'Guest' rights. A callout box labeled '5. Add username and select 'user rights'' points to the input fields. Another callout box labeled '6. Select User rights, guest or supervisor' points to the 'Supervisor' dropdown menu. A third callout box labeled '7. Click save image' points to the save icon in the table.

username	User rights	
<input type="text"/>	Supervisor	
10system	Supervisor	
5system	Guest	

The Solar.web account you have granted permission to view the system will now be able to log in to www.solarweb.com or the Solar.web App to view their system data ((in this example for the system 'Fronius AUS Melbourne').
